

See endangered species without becoming one.

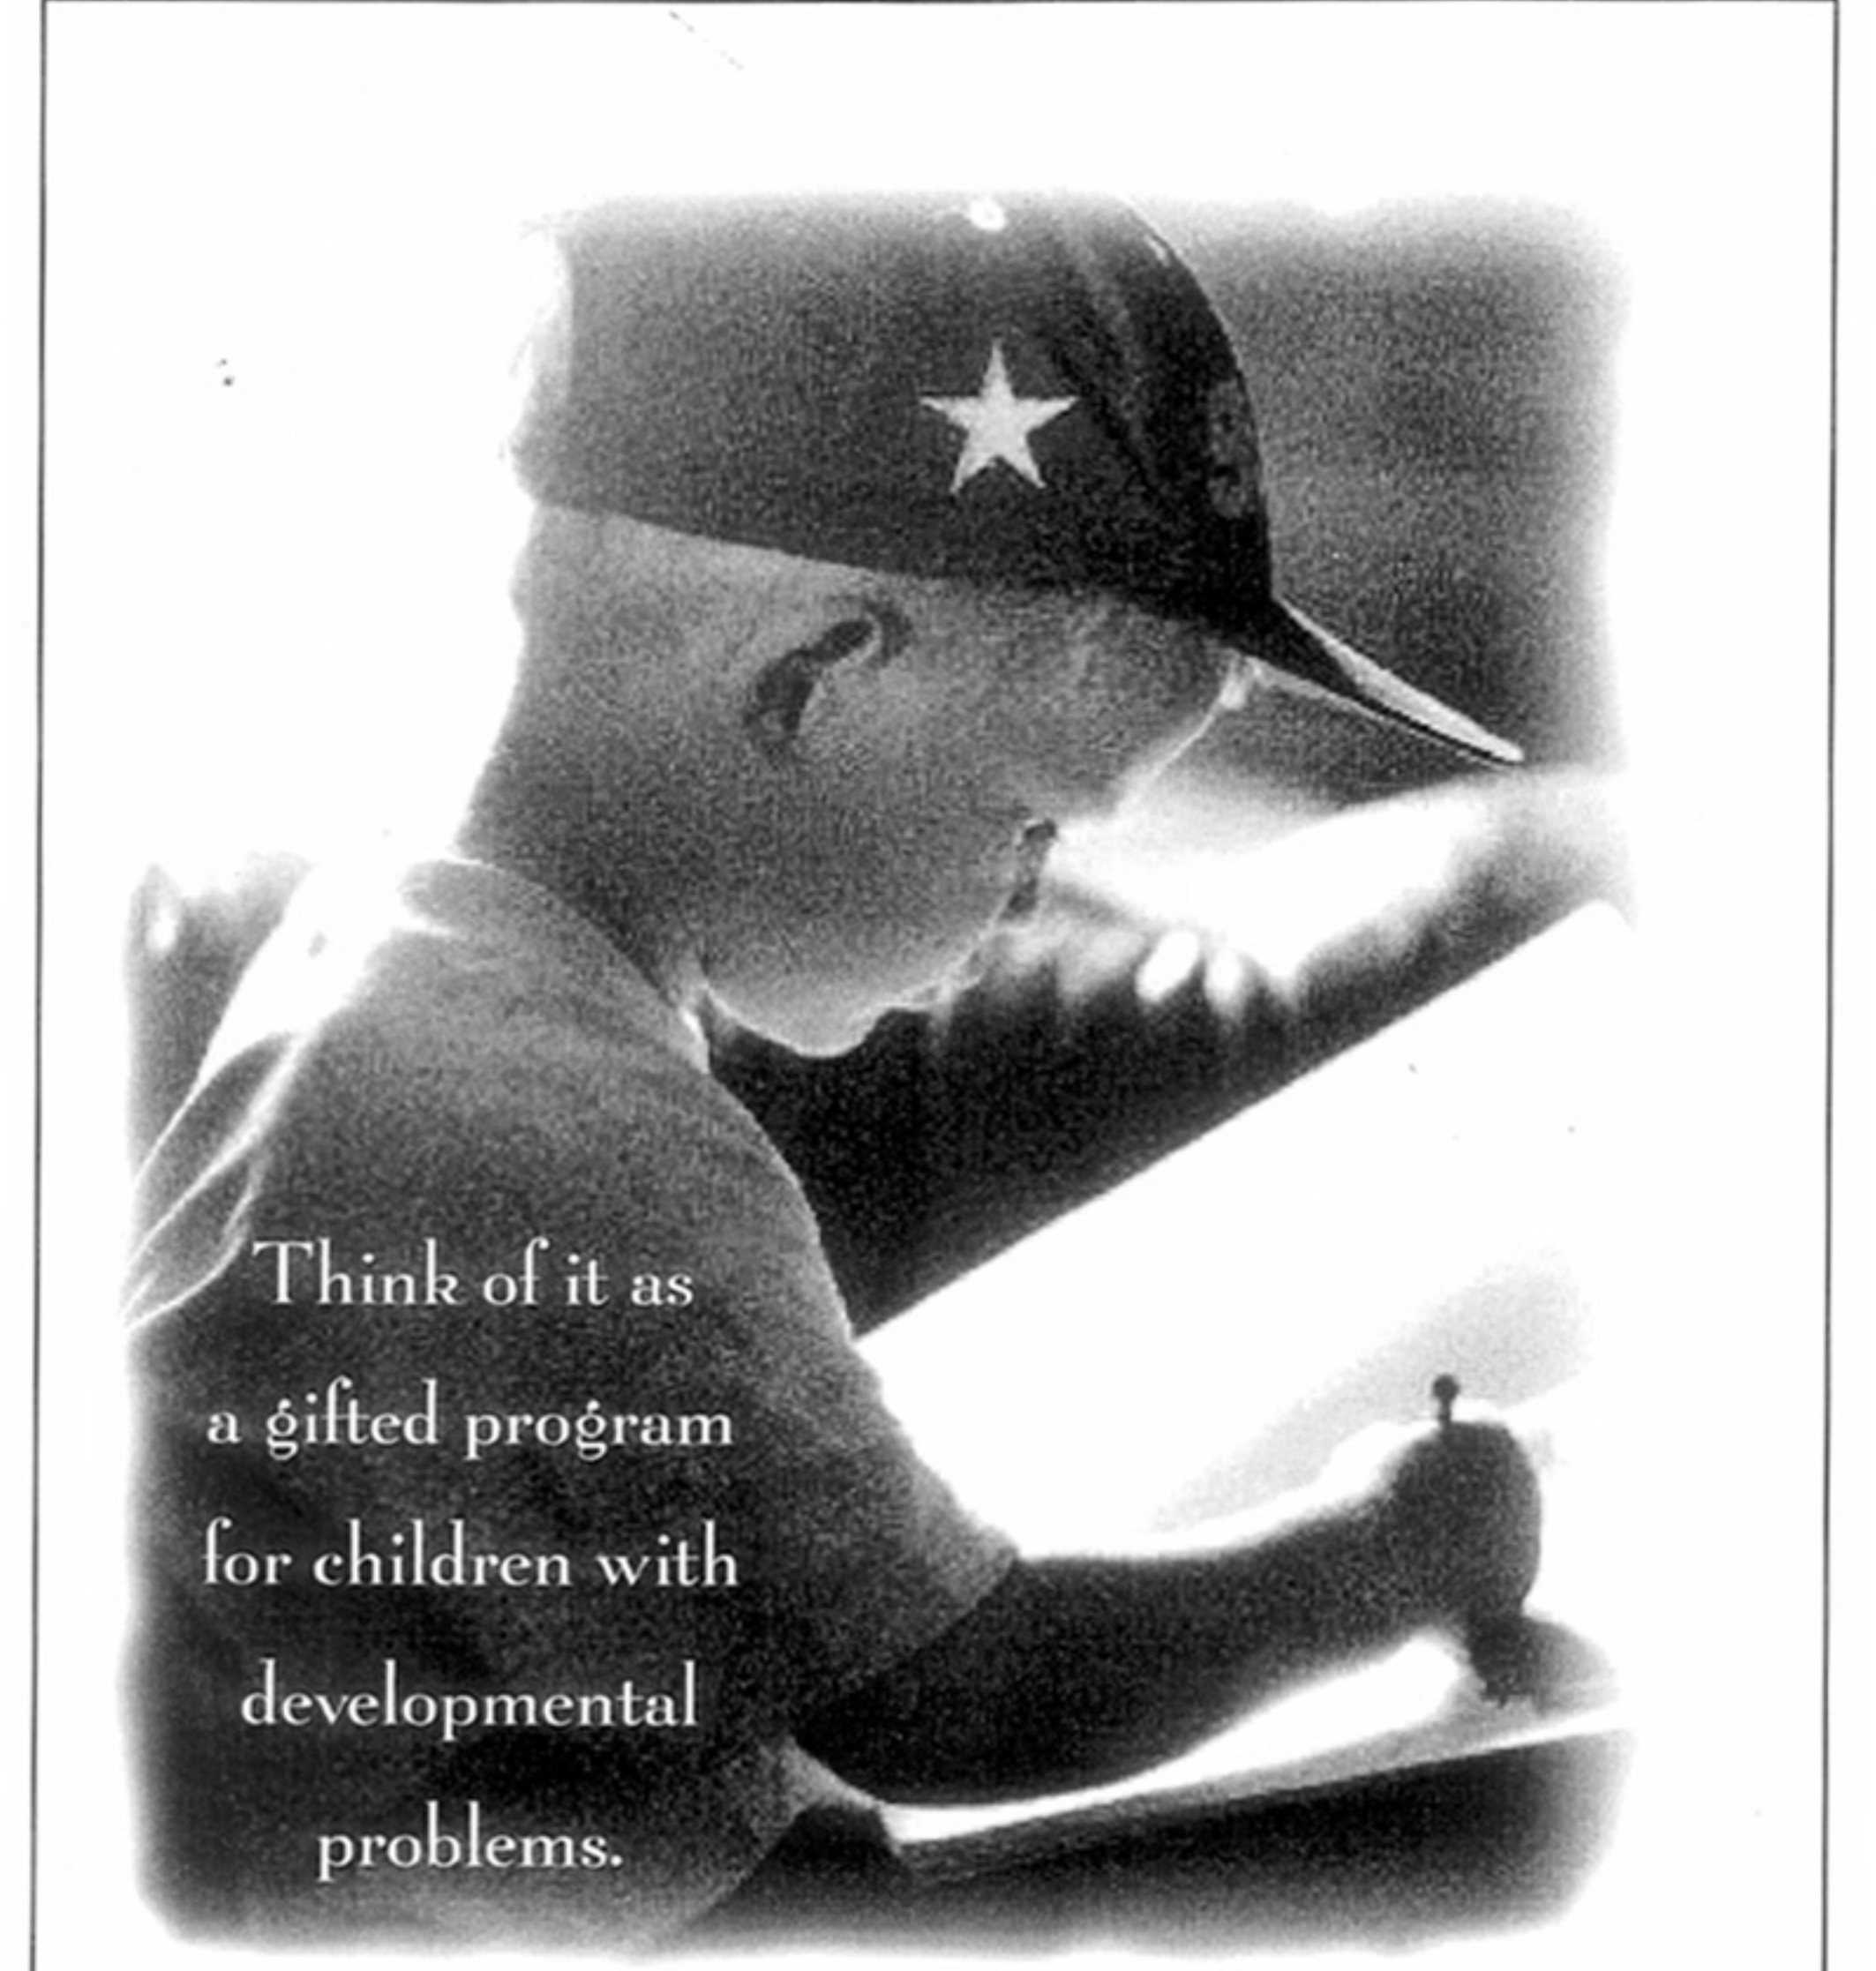

A trip down the Amazon can be one of the most exciting, exotic experiences you'll ever have. The Enlightened Traveler program can help ensure it's a healthy one. Knowing what precautions to take in remote places of the world is what The Enlightened Traveler is all about. By reviewing your specific itinerary, country by country, we will provide you with necessary vaccinations and prescriptions. We'll also counsel you on environmental issues, disease prevention, guidelines for

safe water and food, and offer preventive tips based on any special health considerations you may have. If necessary, your Enlightened Traveler physician will become a consultant to your own Primary Care Physician before, during or after your trip.

Be sure to make The Enlightened Traveler program part of your pre-travel plans. Give us a call at (201) 447-8029 to schedule an appointment. And make sure you don't end up on the endangered species list.

The Enlightened Traveler

Think of it as
a gifted program
for children with
developmental
problems.

Most children who are born prematurely eventually catch up with their peers in height and weight. We're here for the ones who need help catching up in other areas. Speech, hearing, vision and movement.

Valley's Center for Child Development and Wellness offers diagnostic and therapeutic care to special needs children, from high-risk infants we've followed from birth to school age children, many referred to us by schools and community agencies. Our staff includes a

developmental pediatrician as well as a pediatric nurse practitioner.

We also provide emotional support and education for parents. And we can act as advocates to assist families who can benefit from various social services.

Most of all, there's the comfort that comes from knowing our gifted staff will do everything possible to help your extraordinary child do ordinary things well. Like to know more? Call 1-800-VALLEY 1.

What kind of people
would leave their families
in the middle of the night
for a chance encounter
with a total stranger?

Call 911 in an emergency and you'll find out. You may not know this but the emergency rescue workers, ambulance corps, emergency medical technicians, paramedics, police officers and firefighters on Valley's team are all volunteers. Still the cost to them is great, risking more than their lives. That's why we extend this "thank you" note to you and your loved ones, whose sacrifice is real. It's because of your supreme dedication that Valley's Emergency Room is the number one preference of people in our community. There's nothing ordinary about the hours you keep or the danger you face. And you're no less extraordinary for doing what you do.

National Emergency Service Week, May 17-23
